Soon to come:

XAF365

Additional Sensors & Equipment

Xanboo Advanced Feature Module
 Expands capabilities of Xanboo system by enabling two-way communication Xanboo system and advanced Xanboo devices. Connects to USB port on users' PC and to expansion port on Xanboo Controller.

XWC415

Xanboo 2.4GHz Wireless Video Camera
 With built-in motion sensor and microphone, captures time stamped video stills, 10-second video clips and real-time video. This camera requires Xanboo Advanced Feature Module (XAF365) to operate. (see above)

XNF375

15 AMP Power On/Off Control Module

Allows a user to turn electric appliances and machines on or off from a remote location. This requires Xanboo Advanced Feature Module (XAF365) to operate.

XNF305

500 ATT Power On/Off Control Module

Allows a user to turn lights on or off and control their brightness from a remote location. This requires Xanboo Advanced Feature Module (XAF365) to operate.

XGD355

Remote Garage Door Enabler

This expands the range of existing garage door appliances to allow the user to open and close a garage door through their Xanboo system from any location via the Internet. This requires Xanboo Advanced Feature Module (XAF365) to operate.
